1 INTRODUCTION

Al Baraka Islamic Bank B.S.C. (c) (the "Bank") is a closed shareholding company incorporated in the Kingdom of Bahrain on 21 February 1984. The Commercial Registration of the Bank was renewed on 7 January 2008 to change the status from exempt closed joint stock company to closed joint stock company. The Bank operates under a Retail Bank's licence number RB/025 issued by the Central Bank of Bahrain (CBB). The Bank has seven commercial branches in the Kingdom of Bahrain.

The principal activities of the Bank and its subsidiary (the "Group") are taking demand, saving and investment accounts, providing Murabaha finance, Ijara financing and other Shari'a compliant forms of financing as well as managing investors' money on the basis of Mudaraba or agency for a fee, providing commercial banking services and other investment activities. The Bank's registered office is at Building 238, Road 1704, Block 317, Manama, Kingdom of Bahrain.

For details on the Group's subsidiary as of 30 June 2016, refer note 2 of the consolidated financial statements of the Group.

The public disclosures under this section have been prepared in accordance with the Central Bank of Bahrain (“CBB”) requirements outlined in its Public Disclosure Module (“PD”), Section PD-3: Public Disclosure requirements, CBB Rule Book, Volume II for Islamic Banks.

2 CAPITAL ADEQUACY

To assess its capital adequacy requirements in accordance with the CBB requirements, the Group adopts the standardised approach for its credit risk, basic indicator approach for its operational risk and standardised measurement approach for its market risk. The CBB capital adequacy requirement is minimum accepted level for capital adequacy. The credit committee of the Group identify and approve assets suitable for funding by equity of Investment Accountholders ("IAH").

For the purpose of computing the Capital Adequacy Ratio (“CAR”) and preparation of the PIRI form, the Group's financial subsidiary (Al Baraka Bank (Pakistan) Limited) and significant investment Itqan Capital Company are consolidated. With respect to Itqan Capital Company, the consolidation took place in all related attached schedules effectively from 01 January 2015 as per the requirement of the CA Module and based on the approval obtain from the CBB, except where otherwise stated; as a result of consolidation of Itqan Capital Company for regulatory purposes, the amounts in certain tables within the quantitative disclosures might not match the amounts reported in the audited consolidated financial statements of the Group and the reviewed financial statements of the current period ended 30 June 2016 and the comparable period ended 30 June 2015.

Legal restrictions on capital and income mobility

Distributing profits by subsidiaries to the parent is subject to compliance with applicable laws and regulations in Pakistan. Such distribution should go through the legal and regulatory channels applicable in relevant jurisdiction (i.e. Pakistan). Mobilsation of capital, reserves and equivalent funds out of the subsidiary to the parent is subject to the local rules and regulations. The parent is not subject to any restriction to support its subsidiary in the form of deposits or capital. However, as a procedure and approval has to be obtained from the CBB for increasing investment in subsidiaries.

Table - 6. The Group's financial subsidiaries capital adequacy ratios

The following is the Group's financial subsidiary capital adequacy ratio prepared on the basis of SBP requirements, which may differ from the CBB requirements, as

3 RISK MANAGEMENT

Risk management is an integral part of the Group's decision-making process. The risk management committee and executive committees, guide and assist with overall management of the Group's consolidated statement of financial position risks. The Group manages exposures by setting limits approved by the Board of Directors. The Group risk management strategies have been effectively implemented during the year in line with the objective defined.

a) Credit risk

Credit risk is the risk that one party to a financial contract will fail to discharge an obligation and cause the other party to incur a financial loss. The Group controls credit risk by monitoring credit exposures, and continually assessing the creditworthiness of counterparties. Financing contracts are mostly secured by the personal guarantees of the counterparty, by collateral in form of mortgage of the objects financed or other tangible security.

* These exposures includes outstanding amount raised as off balances sheet equity of investment accountholders and other off balance sheet items. Further, these exposures are either exempt or undertaken after obtaining due approval from Central Bank of Bahrain.

Past due and non-performing facilities

Past due represents installments that are not received on the contractual repayments date. The Group defines non-performing facilities as the facilities that are overdue for period of 90 days or more. These exposures are placed on a non-accrual status with income being recognised to the extent that it is actually received/distributed. It is the Group's policy, except for the subsidiary which is following their local regulations, that when an exposure is overdue for a period of 90 days or more, the whole financing facility extended is considered as past due.

Highly leveraged counter parties

Highly leveraged counter parties are determined by the Credit and Risk Management Department on case by case basis according to industry types and credit policies and procedures of the Group. Each industry has clear established leverage ratios set in place internally which are considered threshold for measuring how leveraged is our counterpart (Low, Medium/Acceptable or High). Any excess over such determined ratios, the customer is classified as highly leveraged with high risk. This ratio will have a big impact on Internal Rating / Grading of the customer.

3 RISK MANAGEMENT (continued)

b) Market Risk (continued)

Table – 21. Equity gains or losses in Banking Book (continued)

Market risk arises from fluctuations in profit rates, equity prices and foreign exchange rates.

Profit rate risk

Profit rate risk is the risk that the Group will incur a financial loss as a result of mismatch in the profit rate on the Group's assets and IAH. The profit distribution to IAH is based on profit sharing agreements. Therefore, the Group is not subject to any significant profit rate risk.

Foreign exchange risk

Foreign exchange risk arise from the movement of the rate of exchange over a period of time. Positions are monitored on a regular basis to ensure positions are maintained within established approved limits.

Table – 22. Foreign currency translation risk

Foreign currency risk sensitivity analysis

In order to measure its exposures to currency risk, the Group stress tests its exposures following the standard shocks in this respect which calculates the effect on assets and income of the Group as a result of 20% appreciation and depreciation in foreign currencies in relation to the reporting currency of the Group. This is calculated using various percentages based upon the judgement of the management of the Group.

c) Equity of Investment Accountholders

The Group manages and deploys Equity of IAH according to its Article of Association – Chapter 3 on Rules of Business. In this respect, the Bank invests its own funds separately or jointly with amount received from Equity of Investment Account Holders. These funds received are managed in accordance with Shari' a requirements and standard of prudence is applied in the context of managing the overall portfolios to enable the Bank to exercise its fiduciary responsibilities. The Group is authorised by Equity of Investment Accountholders to invest the funds on the basis of Mudaraba, Murabaha, Salam, Ijara transactions and other forms of contract in a manner which the Group deems appropriate without laying down any restrictions as to where, how and for what purpose the funds should be invested.

The composition, characteristics, diversification, and concentration of portfolios are monitored within appropriate risk limits and indicators detailed in the Group's credit risk, liquidity risk, and other risks policies of the group. The strategic objectives of the investments of the funds are:

a) Investment in Shari' a compliant opportunities;
b) Targeted returns;
c) Compliance with credit and Investment policy and overall business plan; and
d) Diversified portfolio.

Funds are invested in Shari' a compliant commercial or consumer financing as well as short, medium, and long term investments excluding strategic investments. A due diligence process is in place which is consistent with business and risk policy guidelines of the Group after deduction of mandatory reserves and making allowance for short-term liquidity requirements.

3 RISK MANAGEMENT (continued)

c) Equity of Investment Accountholders (continued)

Under all the aforesaid arrangement the Group can commingle the IAH funds with its own funds (Self-Financed). Some of the assets right from inception is designated exclusively as Self Financed by the Group. These self financed assets are deducted from total assets to arrive at “Jointly Financed Assets”. To segregate the Jointly Financed Assets into self financed and Investment accountholders (IAH), the Group applies formula to identify the proportional share of each fund’s in the Jointly Financed Assets .

The Group’s share of profit as a Mudarib for managing equity of IAH and their share of income is based on the terms and conditions of the related Mudarib agreements. These funds are invested in Islamic modes of financing and investments including murabaha, salam, istisna, wakala, musharaka, mudaraba and ijara. The Group is offering these accounts for saving and term accounts ranging from 1 months to 5 years. There are no separate designations for portfolio managers, investment advisors and trustee. IAH accounts are managed at Head Office and subsidiary levels by relevant departments.

Investors' share of income is calculated based on the income generated from joint investment accounts after deducting the expenses related to investment pool "mudarib expenses". Mudarib expenses include all expenses incurred by the Group, including specific provisions, but excluding staff cost and depreciation. The Group's "mudarib profit" is deducted from investors' share of income before distributing such income. In some cases, equity of IAH withdrawn before maturity and without completing three months are not entitled to any income. Equity of IAH held for more than three months and withdrawn before their maturity are entitled to income only after deducting a penalty charge equivalent to three months income.

The basis applied by the Group in arriving at the investment accountholders share of income is [total investment income less investment pool expenses] divided by [average funds generating income (shareholders and equity of investment accountholders) times average funds of equity of IAH].

Investment risk reserve
The Group deducts investment risk reserve as per approved policy from time to time from the profit distributable to equity of investment accountholders of its Bahrain operations, after allocating the Mudarib share in order to cater against future losses for equity of IAH.

Profit equalisation reserve
The Group appropriates a certain amount in excess of the profit to be distributed to equity of investment accountholders before taking into consideration the mudarib share of income. This is used to maintain a certain level of return on investment for equity of IAH.

Displaced commercial risk
The Group is exposed to displaced commercial risk in the event of having equity of IAH profit rates that are lower than market rates. The Group has mitigated this risk through the setting up of reserves that will be used in case of a drop in IAH profit rates. The policies and procedures for displaced commercial risk are formulated and implemented at the segment level (Pakistan and Bahrain).

Complaint procedure / awareness programs
A complaint management system is established; procedures on handling complaints have been developed, new Complaints form has been introduced, a number of complaints channels are available where customers can communicate through branches, call centre, email, dedicated staff number and web-site. Monitoring procedures have been developed as well.

The Group uses it's website, print and electronic media for consumer awareness program and to inform about new products.

e) Liquidity risk

Liquidity risk is the risk that the Group will be unable to meet its payment obligations when they fall due under normal and stress circumstances. To limit this risk, management has arranged diversified funding sources, manages assets with liquidity in mind, and monitors liquidity on regular basis. The liquidity management policy at a minimum includes the following:

a. Provide clear guidance on the composition and role of the asset/liability committee or such other committee or department responsible for managing liquidity.

b. Establish approval processes to ensure adherence to liquidity risk management processes.

c. Require periodic calculations to determine the extent to which the segments are funding long-term assets with short-term liabilities.

3 RISK MANAGEMENT (continued)

e) Liquidity risk (continued)

d. Establish liquidity ratio benchmarks, e.g. parameters for the funding of long-term assets with short-term liabilities to guide liquidity management and the method for computing liquidity indicators.

e. Establish limits on the degree of concentrations that are deemed acceptable. This should:

i) Ensure diversification of funding by origin and term structure by, for example, guarding against concentration by individuals or groups of depositors, types of deposit instruments, market sources of deposit, geographical sources, term to maturity, and deposit currencies. Where concentrations occur, the segments manage their assets and liquidity profile to mitigate the risk; and

ii) Set procedures for the orderly restoration of the liquidity position in the event of loss of funding where such concentrations are unavoidable. In addition, the segments conduct an impact analysis on its dependency on any such concentrations.

f. Provide for periodic review of the deposit structure. The review should include the volume and trend of various types of deposits offered, maturity distributions of time deposits, profit rate paid on each type of deposit, prevailing market profit rate, limits on large time deposits, public funds, and non-resident deposits.

g. Provide for the review of alternate funding sources including stand-by facilities and lines of credit.

h. Establish a framework for the composition of assets.

i. Assess the acceptable mismatch in combination with currency commitments. The segments undertake separate analysis of their strategy for each currency individually. They set and regularly review limits on the size of cash flow mismatches over particular time horizons for foreign currencies in aggregate, and for each significant currency.
